## QUALITY COMMITMENT

*Quality is Our First Priority.*

*Consistent product quality and a proven track record makes Australian Pipeline Valve a dependable choice where total reliability is the number one concern.*

*Since its founding, APV's philosophy has been focused on quality. Our valves are manufactured in full compliance to worldwide standards (such as ASME/ANSI, API, EN, ISO, BS, AS).*

# PARALLEL SLIDE GATE VALVE

CAT P316S CLASS 150-900

For installation in applications such as industrial, mining and mechanical services. Suitable for super-heated steam, H.T.H.W steam condensate and water.

This design consists of two discs, kept in contact with parallel body seats, using the line pressure and seating action to effect tight closure.

Temperature changes in the line are accommodated by the expanding disc & do not affect the action of the valve. When being opened or closed, the discs slide across the seat faces, dislodging any foreign matter. The valve operating stem is outside screw rising through the handwheel.

These valves are suitable for full bore steam use, where a low pressure drop across the valve is required.

Also suitable for water, oil, gas, etc.

## FEATURES

Expanding style parallel slide gate valve suitable for super-heated steam, H.T.H.W steam condensate and water.

Temperature changes in the line are accommodated by the expanding disc and do not affect the action of the valve. When being opened or closed, the discs slide across the seat faces, dislodging any foreign matter. These valves are suitable for full bore steam use, where a low pressure drop across the valve is required.

Also suitable for water, oil, gas, etc.

PARALLEL SLIDE GATE VALVE

**PARALLEL SLIDE GATE VALVE**

CAT P316SF-WF CLASS 150-2500 (15~50NB)

For installation in applications such as industrial, mining & mechanical services. Suitable for super-heated steam, H.T.H.W steam condensate & water.

This design consists of two discs, kept in contact with parallel body seats, using the line pressure and sprung seating action to effect tight closure.

Temperature changes in the line are accommodated by the expanding disc & do not affect the action of the valve. When being opened or closed, the discs slide across the seat faces, dislodging any foreign matter. The valve operating stem is outside screw rising through the handwheel.

These valves are suitable for steam use, where a low pressure drop across the valve is required. Also suitable for water, oil, gas, etc.

## DESIGN FEATURES

- Inconel or 321SS Bellows
  - For longer life
  - Maximum corrosion resistance
- Flanged, screwed or welded end connections
- Welded or bolted bonnet design
- Zero stem leakage
  - Eliminates media loss
  - Satisfies environmental regulations
- Zero maintenance
  - Lower operating costs/no downtime
- Three stem seals for safety
  - Metallic bellows
  - Graphite packing
  - Backseat in open position
- Reduce monitoring costs
- Hardfaced seating surface
  - Stellite 6 for long life
- Valve designed, manufactured and tested
  - To ANSI B16.34/API 602 & 598
- Additional alloy and trims available
- For applications where leakage into or out of the valve is unacceptable
  - Heat transfer oil
  - Toxic fluids

## QUALITY ASSURANCE AND CERTIFICATION

*We are continually improving all facets of quality assurance. Full metallurgical and test certificates are always supplied for all pressure retaining parts, we also provide it on all major trim components.*

*We have endeavoured to provide a broad outline of our range and capabilities. Because we are continually developing new products for our customers this catalogue will, to some extent be incomplete. This catalogue is a general overview only, individual drawings and data sheets can be furnished on request.*

*If you have any requirement in the field of valves, please contact us for a prompt response. Continuous development of Australian Pipeline Valve products may necessitate changes in the design or manufacturing processes. Australian Pipeline Valve reserves the right to effect any such changes without prior notice.*
